

Metering, energy data and network services for Britain's energy and utilities market

Our Mission

“To be the leading independent provider of Multi-Utility metering and network services, delivering efficiency, innovation and value. An organisation which is trusted to meet the needs of its stakeholders in a safe, reliable and sustainable manner.”

Our Core Values

Our Goals

1. Maintain and grow metering and data assets and value of data provision.
2. Grow EAU brand and products across the sector.
3. Identify, attract, develop and retain high performing talent.
4. Harmonise and simplify systems and processes to deliver internal and external value.
5. Exploit core skills for alternative market products and segments.
6. Create a diverse workforce which respects our environment, local communities through ethical and sustainable practices.
