# At Energy Assets we believe in our people.

**“This apprenticeship has been invaluable in helping me understand my role in a real-world environment, and has taught me a great deal about the industry and the sector.”**

*Sean Kane, Apprentice - IT Support Analyst*

At the Energy Assets Group we believe our People are our most valuable asset. We are committed to making Energy Assets a great place to work, and an employer of choice.

Our Apprentice Programme offers in-depth, experiences which will equip the next generation with all of the necessary skills to make a positive and impactful contribution to Energy Assets whilst developing lifelong personal and professional skills.

EVERYTHING CONNECTS

# We are looking for people like you.

As an Energy Assets Apprentice, you can expect to experience real working conditions in a fast growing business at the heart of an industry that is constantly evolving.

From your first day you will receive robust and comprehensive training to allow you to start working on real-life projects with responsibilities.

During your apprenticeship you will experience all aspects of professional working life. This includes working with experienced and knowledgeable managers and colleagues who will support and guide you in your progression. You will be involved in work designed to hone your independent management skills.

When you've completed your apprenticeship with Energy Assets you will have fundamental and detailed work experience and knowledge of professional working life.

As a result of our partnership association with accredited apprenticeship providers across Great Britain, our apprentice's work will count towards having an approved Standard.

Your time as an Energy Assets Apprentice will typically last between 1-3 years depending on your Apprenticeship Standard.

We are delighted to accommodate you at any of our Energy Assets locations in Scotland, England and Wales.

## Opportunities

A few of the exciting real-world apprenticeships that may be available are:

- Utilities Engineering Technician
- Electrical Power Networks Engineer
- Power Network Craftsperson
- Dual Fuel Engineer – Smart Metering
- Gas Engineering
- Data Analyst
- IT
- Business & Administration
- Customer Service

# At Energy Assets you won't be alone.

At Energy Assets we fully support and guide our Apprentices.

You will have access to an extensive network of supportive and experienced personnel, comprehensive training, active coaching and mentoring throughout your apprenticeship with us.

Apprentices will receive assessments, observations and reviews carried out in the workplace, and some will also attend a local college on Day Release.

Regardless of how you're evaluated you will receive regular internal reviews with your Energy Assets line-manager throughout your programme.

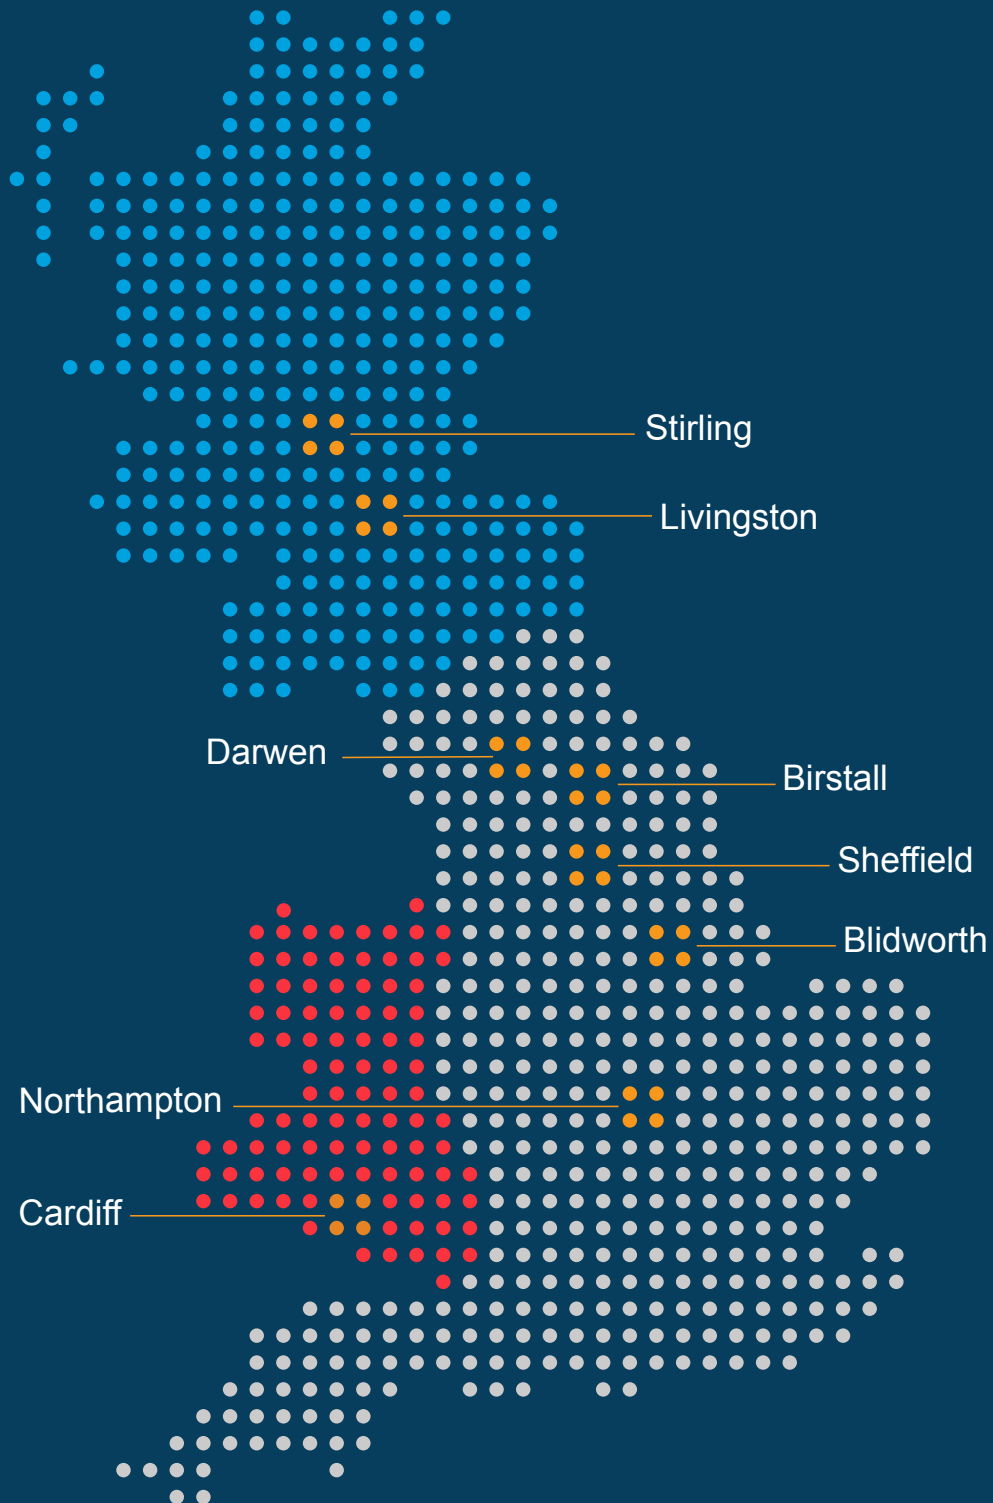

## **At Energy Assets you will earn more than just experience.**

As an Energy Assets Apprentice you will be earning a real wage alongside gaining real-life experience.

At the end of years 1, 2 and 3 (depending on the length of your apprenticeship), you will complete a formal review which is intended to guide you in the right direction for what comes next in your career journey.

# Energy Assets Locations

# Energy Assets

Energy Assets is one of Britain's leading and fastest growing independent industrial and commercial multi-utility metering businesses, network construction and asset adoption services, helping private and public sectors to improve their energy efficiency through ground-breaking technologies, data analytics and innovative customer-focused processes.

Energy Assets is a large company which is constantly growing and expanding. As such we employ a diverse workforce who help make Energy Assets the company that it is.

As an employer of choice, we want to make sure any Apprentice benefits accordingly from the programme.

In order to do this we have a recruitment process, in partnership with accredited apprenticeship suppliers to help us select the right person for our roles. This means that our partners will pre-screen you, as well as visit us to ensure that you will undertake the right type of work to meet your apprenticeship criteria.

## What we offer

### From commencement:

- Generous annual leave
- Life assurance
- Critical Injury Cover
- Access to a range of discounts and offers via Perkbox
- Cycle to Work Scheme
- Employee Assistance Programme
- Access to a workplace pension
- Opportunity to earn a recruitment referral bonus
- Comprehensive training and development

# At Energy Assets we value you...for who you are.

Energy Assets employs over 750 people across Great Britain and no two are the same.

We believe it is our differences that help make this company an energising and inviting place to work.

We believe in inclusivity and diversity and that is why everyone will be welcomed at Energy Assets.
